Bachelor's Degree, Finance & Accounting
Agricultural University of Tirana
2013 - 2016

/CERTIFICATIONS

Modern JavaScript From The Beginning 2.0
Udemy · Verify

React & TypeScript – The Practical Guide
Udemy · Verify

/LANGUAGES

Albanian - Native
English
Italian

/PROFILE

Full stack developer with 5+ years of experience building production React and TypeScript applications, with hands-on React Native and Expo experience from Okko, a social and jobs mobile app where I built both the app and its Node.js/Express backend (MongoDB, PostgreSQL). Brings strong React fundamentals (Redux, component architecture, API integration) to mobile, and delivers features end-to-end, from UI to API and deployment.

/WORK EXPERIENCE

Full Stack Developer — Oracle Law Global (formerly Oracle Solicitors)

June 2024 - Present
React • TypeScript • Python • Claude API

- Worked on developing AI Defense Builder, software that automatically generates legal defense drafts for flight-related cases; in testing, cut estimated drafting time per case from ~2 hours to 15–20 minutes.
- Built Rebooking, a tool giving lawyers access to historical flight data to support cases involving disrupted flights.
- Led the rebrand to Oracle Law Global and rebuilt the firm's website (WordPress/Elementor); manage its hosting, SSL/DNS, SEO and GDPR compliance.
- Automated a manual data analyst workflow with a Python script that distributes incoming cases evenly across employees.

Full Stack Developer — Okko (Freelance)

November 2025 - September 2026
React Native • Expo • Node.js • Express • MongoDB • PostgreSQL • AWS

- Built a React Native/Expo mobile app end-to-end where users chat, share project ideas, post and browse open jobs, and connect with other people, integrated with the backend over REST APIs.
- Built the Node.js/Express backend with MongoDB and PostgreSQL and JWT/bcrypt authentication, in a microservices architecture on AWS/CodeArtifact.

Front-End Developer — Division 5

January 2023 - June 2024
React • Redux • TypeScript • SCSS • Babylon.js

- Delivered new features and ongoing support for Circular Fashion, a platform where users sell, swap or donate used clothing, using an internal component library.
- Built Osgenic, a 3D gaming web app that challenges doctors to identify anatomical parts, using Babylon.js.

Front-End Developer — Engage Technology

June 2022 - December 2022
React • JavaScript • React Router • Axios • Tailwind

- Shipped features and bug fixes for Binschonda, a web app providing everyday task support for elderly users.

Front-End Developer — Linfa SH.P.K

April 2021 - May 2022
React • Redux • TypeScript • Material UI • C#

- Built CQS, a bank application enabling employees to take out payroll-deducted loans (C#, Bootstrap).
- Built LSS, a recruiting platform matching open roles to company needs (React, Redux, TypeScript).
